

PRESS RELEASE

New Release: Lomboz™ 3.3 Provides Features for SOA, Enterprise Portals and Web Development

Istanbul, Turkey, and Brussels, Belgium, October 8, 2007 – Eteration, an innovative company specialized in Java Enterprise Technology (Java EE), Service-Oriented Architecture (SOA) and Object-Oriented Modeling and Analysis, and OW2 (formerly ObjectWeb), an international nonprofit consortium of companies and research organizations, today announced the availability of OW2 Lomboz™ 3.3 with features addressing SOA, BPEL and Enterprise Portals.

Eteration and OW2 announce the availability of OW2 Lomboz™ 3.3, this all inclusive package with features addressing SOA, BPEL, and Enterprise Portals also includes the latest version of eXo Platform and Liferay Portals.

Lomboz™ 3.3 includes all new editors for BPEL, BPEL runtime support with Apache ODE, as well as editors for Apache Struts, Spring Beans and Hibernate.

With this release, Lomboz provides an IDE that has tools for Struts, JSF, Portals, JPA, Databases, Hibernate, Spring Framework, BPEL and of course Java EE development with EJBs, Servlets and JSPs. Lomboz™ 3.3 also contains tools for the popular Apache Struts Web framework that makes working with struts XML configurations easy.

Lomboz 3.3 will be available in the form of Cloudsmith™ “virtual distros,” which streamlines the process of downloading and assembling all prerequisites and third-party packages. Lomboz 3.3 will also be available as conventionally packaged downloads. By choosing the virtual distro option, the entire Lomboz 3.3 environment will be automatically retrieved and assembled on your local machine.

Over the last three years, OW2 Lomboz™ has had over 3 million downloads and is well established in its fifth consecutive year at the top of OW2’s downloads.

“Eteration continues to show its commitment to OW2 Lomboz™, Eclipse Foundation and Open Source Technology,” said Eteration CEO Naci Dai. “We are building new strategic alliances within Open Source; now including Apache ODE and Eclipse BPEL. The addition of these new features provides the first out-of-the box open SOA tool with support for designing and running BPEL 2.0 processes. In addition, Web development with Lomboz has never been better with the latest tools for open application frameworks and standards such as JSF, AJAX, JPA, Spring, Hibernate and Struts, JSR 168 portlet development and extended support for eXo Platform and Liferay Portals.”

“The momentum achieved by Lomboz is extremely gratifying for the OW2 community. Lomboz success illustrates the innovative thrust of the OW2 community, it also demonstrates the power of the open source model in software areas where standardization is a key driver of user adoption.” said Cedric Thomas, CEO of OW2.

Professional support is available from [Eteration \(www.eteration.com\)](http://www.eteration.com) for individuals and enterprises.

The new version is currently available as [downloads*](#) and from the [Lomboz Update Manager**](#).

About OW2 Lomboz™

OW2 Lomboz™ is a popular integrated development environment (IDE) based on Eclipse Callisto (v.3.2) and targeting Web, Web Services, Java EE™, EJB™, portal and SOA development. Since version 3.0, Lomboz is based on Eclipse Web Tools Platform and provides advanced packaged features that facilitate development and testing of Enterprise Java Applications. Now all Lomboz™ releases are also made available from our Update Site. You can start using Lomboz™ [Update Manager](#) in addition to All-in-one-zip files; SDK's and minimal runtimes are also available from the download site.

About Eteration

Eteration provides enterprise software solutions and infrastructures built on Open Source and standards. A leader in Java Enterprise Technology (Java EE), Service-Oriented Architecture (SOA), Web Technologies and Object-Oriented Modeling and Analysis; the company prides itself on being a service-oriented company that provides a single source for education, outsourcing, and software solutions. Eteration is a corporate member of OW2, a member of Eclipse Web Tools Platform's project management committee, leads the Java Standard Tools subproject and is also a provider of tools, developer resources and server infrastructures to Eclipse WTP project.

Eteration continually invests in the research and development of Lomboz™. As recipient of the TUBITAK research grant, the development of OW2 Lomboz™ is funded by the ITEA-OSIRIS project and TUBITAK.

About OW2

Founded in January 2007 as a result of the merger of ObjectWeb and OrientWare communities, OW2 is an independent industry consortium dedicated to developing open source code middleware and to fostering a vibrant community and business ecosystem. Building on the legacy of ObjectWeb and OrientWare, OW2 federates more than one hundred organizations and 6000 developers in Europe, Asia and the Americas. OW2 hosts over one hundred technology *Projects*, including Lomboz, Sync4j, eXo Platform, XWiki, SpagoBI and JOnAS. Several of these projects are combined into market-driven *Initiatives*, such as the ESB/SOA Initiative and the Business Intelligence Initiative, which facilitate their implementation by systems integrators, OEMs and end-users. A typical global open-source organization, OW2 aims to bring together grassroots communities across all continents through *Local Chapters*.
